BROTHER AND SISTER DULLES WANT TO START A 38TH PARALLEL IN BERLIN

It has just become known that not only Eleanor Dulles, the Berlin specialist of the US State Department, but also her brother Allen, Chief of the US espionage, have been in Berlin for a week.

As was already reported on 13 June 1953, Eleanor Dulles is chiefly responsible for the rapid transforming of the West Berlin economy to armament. Her special project is to include the Dahlem Institute for Physical Chemistry in the US atom bomb preparations on German soil.

The French newspaper "Humanite" has learned that the fascist putsch of 17 June was under the direct supervision and guidance of the brother and sister Dulles. The newspaper recalls the fact that their brother, the present US Secretary of State, appeared in Seoul the night before the Syngman Rhee aggression on North Korea in order to fire the first shot.

"Humanite" reports further that now that the Korean War is drawing to a close, John Foster Dulles has instructed his brother and sister to establish a new 38th parallel in Berlin.
